RE: CR 1200N; overpass for I-69

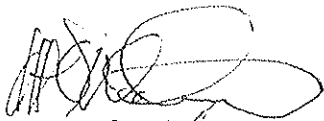

Dear Mr. Sarvis:

We are writing this letter to make you aware of a safety hazard on the overpass on CR 1200N for I-69. Several residents are concerned about site view and the steepness of the slopes, especially when used by oversized farm equipment and the relationship that has to motor vehicles.

We have visited the site and agree with the complaints and feel that this overpass needs to be re-addressed for safety concerns for the traveling public. We understand there was no error in design, however we feel there was planning errors, and the 30 MPH speed limit is not adequate for the mixture of traffic that will utilize this overpass.

We respectfully recommend to INDOT that this overpass be re-designed and corrected to allow for 45 MPH design speeds, so as to provide flatter and longer slopes, to greatly improve site distance.

We thank you in advance for your prompt attention in this matter.

Larry M. Wilson
